SKILLS

Web & Code

React, JavaScript, HTML, CSS, Vite, Lenis

3D & Motion

Three.js, WebGL, GSAP, procedural animation

Design

Layout & typography, digital graphics, posters, Canva

Build & Make

3D printing, Cricut, laser cutting, Sphero & LEGO robotics

Present & Lead

Deck design, public speaking, storytelling

STRENGTHS

Creative thinking

visual angles that make work memorable

Teamwork

builds with people, not just beside them

Adaptability

adjusts quickly when an approach fails

Presentation polish

finishes projects so they look complete

EDUCATION

Erindale Secondary School

International Baccalaureate (IB)
Incoming, Fall 2026

Intl. Business & Technology (IBT)

Current

Arjun Sharma

Student Creator · Web, Design & Interactive Projects

PROFILE

Self-directed student creator heading into high school, turning ideas into finished digital products: interactive websites, real-time 3D browser animations, explainers, and presentation decks. Works where technology, business, and design meet, and learns by building: research a topic, prototype it, break what is unclear, then present it clearly. National Finalist, Samsung Solve for Tomorrow (2025).

SELECTED PROJECTS

AERIS

WebGL · Water simulation · Live demo

A concept website built around water: a real-time WebGL ocean with ambient particles and responsive typography, designed and developed independently.

The Lifetime Test

React · 3D scrollytelling · Energy research

A cinematic, scroll-driven presentation of original battery-storage research, produced alongside a Samsung Solve for Tomorrow submission and Medium articles.

Interactive Explainers

Concept + code · Animation · GitHub Pages

Small web apps that turn complex ideas into clear, interactive visuals, including Debate Club, an AI-versus-AI debate application.

Personal Portfolio

React · Vite · GSAP · Lenis

An interactive, scroll-driven portfolio built from scratch, featuring original 4K drone footage of Toronto with motion tuned section by section.

ACHIEVEMENTS & ACTIVITIES

Samsung Solve for Tomorrow

National Finalist, 2025

One of 12 finalist teams across Canada with an aqueous magnesium battery proposal, competing for the \$50,000 grand prize.

Technology & Energy Writing

Medium, 2026

Explainer articles on energy and engineering, including "Stationary Battery Storage Needs to Forget Everything It Learned from Smartphones."

Original Music, "Troll Legacy"

Composed and produced an original track used as the portfolio soundtrack.
